Department of Electrical Engineering

**EE 496 Poster Presentations**
Thursday, December 5, 2013
3:00 - 5:00 pm
Campus Center 307

**Instructions:**
The EE 496 Poster Presentations showcase your senior capstone research projects, with each project team presenting a poster of their work. Poster presentation is required for all projects, in partial fulfillment of the course’s oral communication focus.

You are encouraged to choose your own poster style to effectively present your project. Example posters can be found online, from faculty, and from other students. A Powerpoint template is available on the EE website. Supplementary material (video, hands-on display, demo model, etc.) is also encouraged. Please let us know in advance if you require special materials (power strip, table, etc.)

On the day of the presentation arrive 20 minutes early to setup your display. Corkboard bulletin boards and pushpins will be provided. The display panels are on loan so staples, tape, glue, or other adhesives are not allowed.

All team members should be present and prepared to talk about their project and answer questions. Your poster will be evaluated by faculty evaluators and industry representatives. Read the evaluation rubric to get a general idea of the questions you will be asked. In particular, note that some of the outcomes evaluated are non-technical; give some thought to how your project demonstrates these outcomes. Your faculty advisor may take the quality of the poster presentation into account in your EE 496 grade.

**Poster Specifications**

Size: up to 36" tall x 48" wide
Printing: free in POST 214

Example poster template available on the UHM [EE website](http://www.ee.hawaii.edu/student/index.php?stc=1&stp=79) (section A.2.)

Topics that should be covered:
- **Problem** addressed
- **Approach** used
- **Results** obtained
- **Ethical** considerations
- **Impact** (economic, societal, environmental, and global)
